

THE BATHROOM

When designing a bathroom, I start with questions:

- Who is using the bathroom?
- Do they have any special needs?
- When do they use it, together or separate?
- Do you like to take a bath or shower?
- Do you ever shower together?
- Do you like to sit in the shower or want a bench or leg rest of some sort?
- How much storage do you need by or in your vanity?
- How many products do you use in the shower and how big are they?
- Do you have a lot of plug in appliances?
- Do you like things out in the open or behind closed doors?
